

LOGIC BUILDING

Assignment 1.

DATE		
PAGE NO.		

1. Check Positive Number:
Flowchart:

Code:

```
class Main {
```

```
    public static void main (String[] args) {
```

```
        int n = 10;
```

```
        if (n > 0) {
```

```
            System.out.println("No. is Positive");
```

```
        }
```

```
        else {
```

```
            System.out.println("No. is not Positive");
```

```
        }
```

```
    }
```

```
}
```

2. Check Negative Numbers.

Code:

```
class NegativeNo {
```

```
    public static void main (String[] args) {
```

```
        int n = -10;
```

```
        if (n < 0) {
```

```
            System.out.println("Number is Negative");
```

```
        } else {
```

```
            System.out.println("Number is not Negative");
```

```
        } } }
```

3. Number is Even Or Odd

Code :

```

class OddEvenCheck {
    public static void main(String [] args) {
        int number = 17;
        if (number % 2 == 0) {
            System.out.println("Number is Even")
        }
        else {
            System.out.println("Number is Odd")
        }
    }
}
  
```

OddEvenCheck.java

Number is Odd

C:\CDACLab\LogiBuildging\Assignment1>

4. Good morning message Based on Time

Code :

```
class GoodMorning {  
    public static void main (String [] args) {  
        int time = 8 ;  
        if (time >= 5 && time < 12) {  
            System.out.println ("Good morning");  
        }  
    }  
}
```

GoodMorning.java

C:\CDACLab\LogicBuildging\Assignment1>java GoodMorning
Good Morning

C:\CDACLab\LogicBuildging\Assignment1>

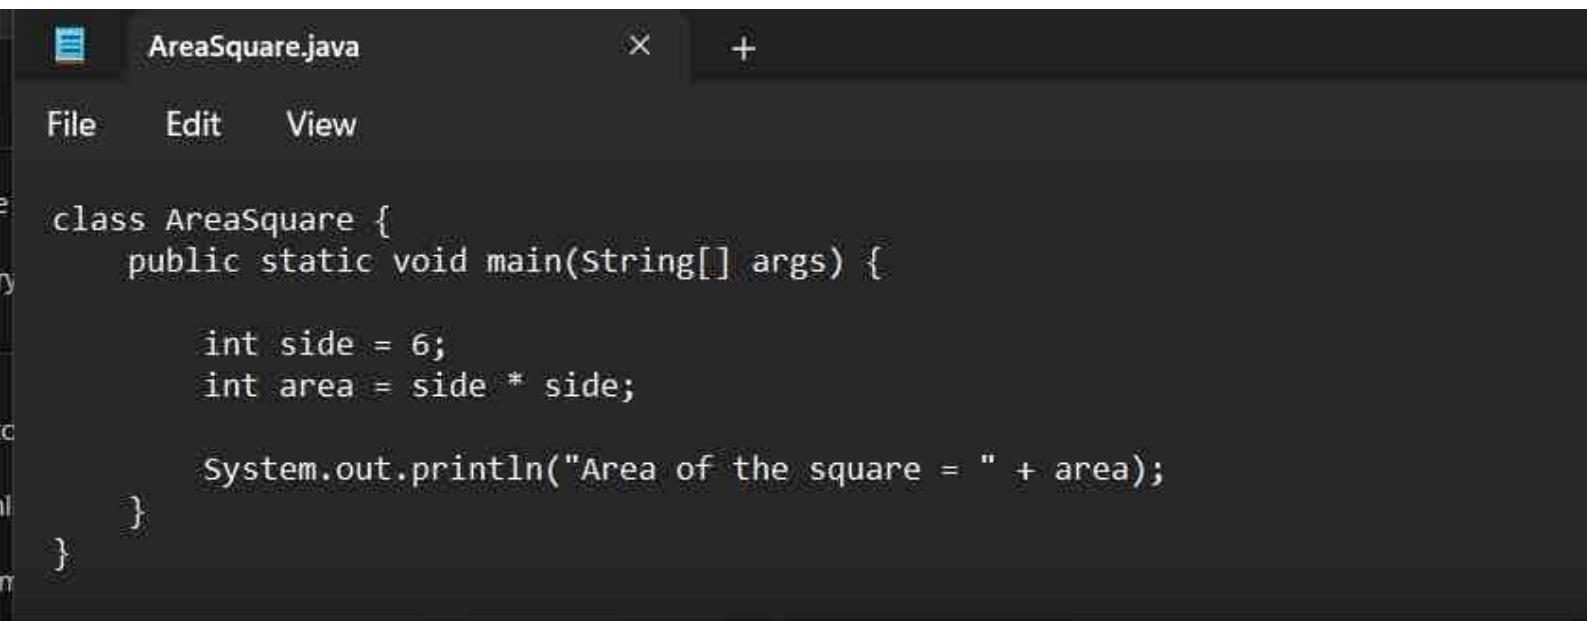

5. Print Area of Square

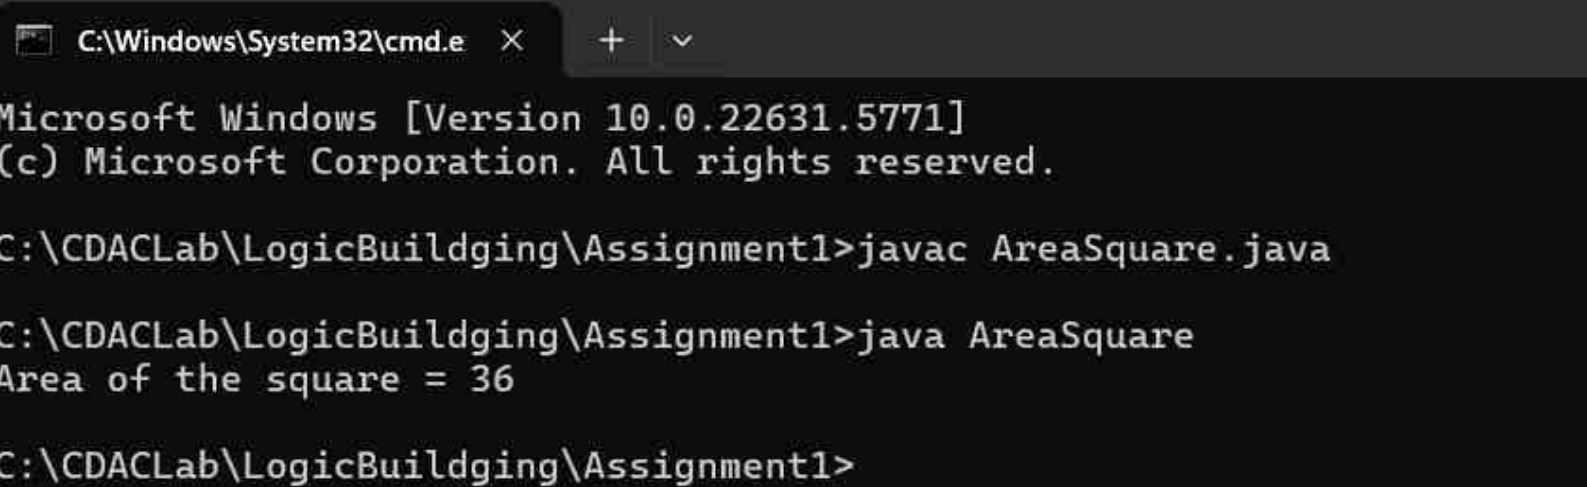

Code:

```

class Square {
    public static void main (String[] args) {
        int side = 6;
        int area = side * side;
        System.out.println ("Area of Square = "
                             + area);
    }
}
  
```

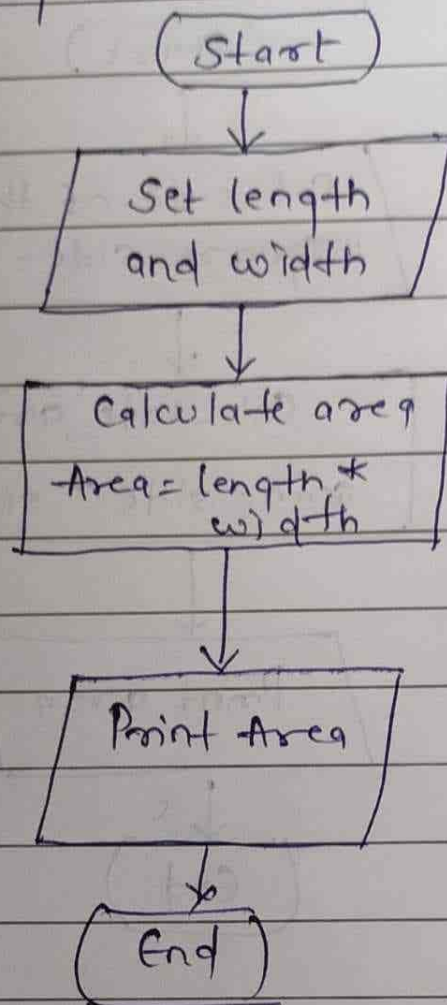

```
class AreaSquare {  
    public static void main(String[] args) {  
  
        int side = 6;  
        int area = side * side;  
  
        System.out.println("Area of the square = " + area);  
    }  
}
```

```

C:\CDACLab\LogicBuildging\Assignment1>javac AreaSquare.java  
  
C:\CDACLab\LogicBuildging\Assignment1>java AreaSquare  
Area of the square = 36  
  
C:\CDACLab\LogicBuildging\Assignment1>
```

6. Area of Rectangle

Code:

```
class AreaRectangle {  
    public static void main (String[] args) {  
        int length = 10;  
        int width = 5;  
        int area = length * width;  
        System.out.println ("Area of rectangle = "  
    }  
}
```

C:\CDACLab\LogicBuilding\Assignment1>java AreaRectangle  
Area of the rectangle = 50  
  
C:\CDACLab\LogicBuilding\Assignment1>
```

7. Largest of three numbers.

Code :

```
class Largest {
```

```
    public static void main (String[] args) {
```

```
        int a = 10;
```

```
        int b = 25;
```

```
        int c = 15;
```

```
        if (a > b && a > c) {
```

```
            System.out.println("Largest number = ")
```

```
        }
```

```
        else if (b > c) {
```

```
            System.out.println("Largest number = " +
```

```
        }
```

```
        else {
```

```
            System.out.println("Largest number = ")
```

```
        }
```

```
    }
```
